WORK EXPERIENCE

FIS: *Senior Engineer*

[Feb 2016 – Aug 2021]

- Collaborated with cross-functional teams to develop Investor's View (IV), a real-time portfolio management service with 250+ global clients.
- Actively engaged in requirement understanding and contributing as well as mentoring fellow developers to deliver high-quality, defect-free code.
- Acted as Scrum Master and responsible for backlog management, sprint planning, estimations, resource management.
- Utilized data analysis techniques to identify performance bottlenecks and solution to keep application performance consistence across releases.
- Member of the Innovation Council, whose mission was to raise product quality and productivity by 25% every year.
- Received LAUREATE a quarterly excellence award for adding a new identifier to the database and codebase, which had a significant impact on the entire code base.

Sungard: *Software Dev Consultant*

[Aug 2015 – Feb 2016]

- As an individual contributor, I was tasked with analyzing requirements, designing, and delivering defect-free code, and providing production support as needed.
- Resolved security flaws and threats identified through static scanning like Veracode and penetration testing.

Byteshell Technologies: *Software Developer*

[Oct 2012 – May 2015]

- Worked as the principal resource on the client side to understand the requirements, propose solutions, and monitor the offshore team communication and deliverables.
- Led a team 6-8 developers as well as testers
- As a individual contributor, worked on designing, and developing code, defect fixing, production support etc.
- Project worked on: Terbia (School management system for Horizontal Private School, Abu Dhabi), PMS (Property management system) etc.

Application Nexus: *Intern developer*

[Jan 2012 – Jun 2012]

- Worked on managing backend for CMS (Content Management System)
- Developed a hybrid mobile application.
